

More Than Technology

Relevant, Ready, and Adaptive Strength for Warfighter Systems and IT Support

We Proudly Present the STG Team for TEIS II

70 years of proven **Combatant, Army, Joint/Coalition, and DoD performance**—the STG Team is a force enabler with relevant experience.

We stand ready to address the Army's current and future requirements:

- 25,000 personnel globally located within every DoD combatant area of responsibility
- 80% of total personnel hold secret or above security clearances
- 2,000 employees currently serving in Southwest Asia
- 400 locations CONUS-wide serving every service
- Co-located at every Force Projection Platform CONUS-wide

Ensuring quality and performance for the Army's critical needs—ISO 9001:2000; CMMI Level 5; ITIL Management Certified; Six Sigma Corporate Certification.

Ready to support and defend the Army's information battlespace with performance-based services—Information Systems Engineering, Integration, and Support; Test and Evaluation; Information Assurance; Rapid Prototyping; Business Process Reengineering, and experienced Program Management.

Experienced, effective, and efficient program management structure—the STG Team understands the critical architecture that must be ready to meet the rapid requirements faced by our soldiers, our Army's infrastructure, and force projection enablers.

STG is an established, privately held company with dedicated employees who bring relevant, ready and adaptive solutions to our government partners. Our ability to rapidly respond to clients' needs and bring the critical resources necessary to meet every mission is the ultimate reason for the success achieved with our clients, employees, and partners.
